

### **Offering**

- Access to Cleo University video content (exclusions apply)
- Includes Cleo Badges & multiple learning tracks
- Content added regularly
- Workshop Courses (where applicable)
- *Coming Soon* - Instructor-led *Office Hours*
- Downloadable course manuals
- Release Training
- SME On-Demand Videos

### **Why Do it**

- Get clarification on B2B/EDI/API concepts during *Office Hours*
- Continuous on-demand learning
- Increased retention of the content and reference material

### **Details**

- *Cleo Certification* is not included
- *Office Hours* are pre-scheduled online group events that multiple customers sign up for

### **Cost**

- \$5k for unlimited access for one individual for a year, or
- \$15k for unlimited access for up to five individuals for a year

## Cleo Badge

Full featured courses from the *Cleo University* Course Catalog. (Exclusions apply)

Course	Delivery	Course Information & Pricing
<a href="#">CE101 CIC - Cloud Edition   Fundamentals</a>	Video 2 hours, 5 minutes	This video course provides an overview of <b>CIC – Cloud Edition</b> and introduces key terms and concepts. Learners will gain an understanding of how to navigate, connect to trading partners using protocols, and integrate with internal back-end systems.  (\$400/student)
<a href="#">CE202 CIC - Cloud Edition   Studio Accelerated</a>	Video 22 minutes	Designed for those migrating from Cleo Clarify® Studio to Cleo Integration Cloud® Studio.  (\$400/student)
<a href="#">CE310 CIC - Cloud Edition   A Smarter DARS</a>	Video 1 hour, 16 minutes	This self-paced video course, which can be viewed at your leisure, demonstrates how to create a Smarter Data Analysis Ruleset (DARS) to determine whether a Route is found for the data being processed. This is applicable to both Outbound EDI Routes and Application Routes.  (\$500/student)
<a href="#">CE321 CIC - Cloud Edition   API-based Integration: Web Service Consumer</a>	Video 25 minutes	In this advanced course, we’ll see a web service consumer solution, and then demonstrate how to support conditional processing based on the response message.  Your web service consumer solution sends a request message to a service made available by a web service provider, which processes the request and then responds to you via a response message.  (\$400/student)

<p><a href="#">CE322 CIC - Cloud Edition   API-based Integration: Web Service Provider</a></p>	<p>Video 40 minutes</p>	<p>In this advanced course, we'll see how to allow web service consumers to safely query your database about a purchase order they previously sent to you.</p> <p>Your web service provider solution detects an incoming consumer request and then provides responses based on the specific configurations within your integration. In CIC, you create and configure objects to accept request messages, process information or perform activity, and send response messages.</p> <p>(\$800/student)</p>
<p><a href="#">CE330 CIC - Cloud Edition   Database Integration</a></p>	<p>Video 1 hour, 38 minutes</p>	<p>This advanced video course shows how to incorporate your internal database into the data transformation workflows is discussed and demonstrated in this course.</p> <p>(\$600/student)</p>
<p><a href="#">CE340 RADAR</a></p>	<p>Video 22 minutes</p>	<p>An introduction and exploration of <b>RADAR</b>, an add-on feature to the CIC Cockpit.</p> <p>(free)</p>
<p><a href="#">CE345 CIC - Cloud Edition   Workload Prioritizer</a></p>	<p>Video 10 minutes</p>	<p>This <u>free</u> video course provides an introduction and exploration of the <b>Workload Prioritizer</b>, an add-on feature to the CIC Cockpit which allows you to control Event-queue processing, including specifying processing priority and the number of active processes on a per-Event basis.</p> <p>(free)</p>

<p><a href="#"><u>CE350 CIC - Cloud Edition   A2A Solutions</u></a></p>	<p>Video 4 hours</p>	<p>This self-paced video course begins with overviews of a typical “Application Pipeline” and various Application-to-Application” solutions. Then we present several “core” Projects, each focused on a particular syntax: Spreadsheet, Flatfile, XML, Database, and JSON. Optionally, 5 different A2A solutions are demonstrated, and the process of populating the Cockpit with transactional data is thoroughly discussed.</p> <p>(\$800/student)</p>
<p><a href="#"><u>CE360 CIC - Cloud Edition   Reference Tables</u></a></p>	<p>Video 1 hour, 7 minutes</p>	<p>This self-paced video course covers the advantages of using Reference Tables in CIC. The course shows how to set up CIC Studio objects, populate values in a Reference Table, query a Reference Table as well as some additional abilities including testing a query to a reference table.</p> <p>(\$500/student)</p>
